## ABOUT ME

I have always interested me a lot for Multimedia and electronic. Ever since I was a kid, I've always been very creative.

Since then, I've become better and better. Multimedia is today, a big part of my leisure. I therefor spend a lot of my time making graphical things in Photoshop and code/programming websites. This may range from smaller to larger projects.

In addition, I also love music and films. The interest in films, I've always had, while filmmaking originated in 10<sup>th</sup> grade.
